

# Papillon Club of America Health & Genetics

## ELYSE VANDERMOLEN

I have been involved with dogs and animals most of my life. I started in 4-Second generation exhibitor/breeder, always with an interest in genetics. Fortunately my hobby evolved into a career - Clear Lake Kennels, Inc. (Boarding/Grooming, Webster, TX), since 1986. My involvement with Papillons began in the late eighties with my first national specialty in 1992.

Prior to that I was involved with Anatolian Shepherds (early eighties) and helped obtain the breed's AKC recognition. As a child I showed in Junior handling.

With today's medical advancements and research capabilities many current genetic issues could be eradicated. I hope to see that on several fronts!

### Club Affiliations:

Houston Kennel Club, Toy Club of Greater Houston, Houston Area Papillon Club (President and founding member), Anatolian Shepherd Dog Club of America (Past board member, Vice President)
